

## **S&S 34 Association Inc.**

### **Webmasters Report 2017-2018 AGM.**

News and updates have been posted to the website regularly by Ron and me.  
I am planning to add video to the website as we discussed at previous meetings.  
I have a friend who has offered to fly his drone and take footage of the yachts.

The ss34.org website was down for about a week in June due to relocation of servers at FutureTech our web host. Unfortunately, I wasn't told about the relocation until it was too late.  
Fixing the problem required a small change at the domain host Webcity however the domain hosting there had expired so I took the opportunity to host the domain at VentraIP in Australia. Domain hosting with VentraIP costs \$19.95 per year for the ss34.org site.

I will be relocating the website to VentraIP in the next 2 months and adding SSL security. Websites without SSL security will become unavailable on some web browsers soon.  
Web hosting will cost \$6.95 per month and will come with a free SSL certificate.

If there are any volunteers who could assist me with the design of the new website that would be greatly appreciated.
